

Lauren J. Isley, MS, LCGC

Lauren J. Isley, MS, CGC, is a Clinical Science Liaison at Generate Life Sciences, the parent company of California Cryobank and Donor Egg Bank USA. She received her Bachelor's Degree at the University of Missouri in Columbia, MO and received

her Master's Degree in Genetic Counseling from Wayne State University in Detroit, Michigan.

Following graduation, she was hired by Genesis Genetics (now Cooper Genomics) in Detroit as a genetic counselor and established her reputation for excellence there in helping individuals and couples to understand and make informed decisions based on preimplantation genetic screening and diagnosis. In 2013, Ms. Isley transitioned from Genesis Genetics to a position at California Cryobank, where she counseled gamete donors and recipients. She joined Counsyl (now Myriad Genetics) in 2016 as

a clinical laboratory genetic counselor. Lauren then re-joined California Cryobank, now part of the parent company Generate Life Sciences, in 2019 in a different role as a Clinical Science Liaison. Lauren works directly with reproductive healthcare providers to provide education and support regarding gamete donor screening and newborn stem cell banking.

She is an active member of the American Society of Reproductive Medicine, where she is the incoming Chair of the Genetic Counselor Professional Group. Lauren is also the former chair of the National Society of Genetic Counselor's Special Interest Group on Assisted Reproductive Technologies/Infertility. She has authored 2 publications in Fertility and Sterility regarding genetic evaluation of gamete donors and management of inherited risks in donors and donor-conceived offspring. Ms. Isley also has served as faculty at several national conferences and has presented several abstracts at multiple reproductive medicine meetings.
