

Lauren J. Isley, MS, CGC

Lauren J. Isley, MS, CGC is a Senior Clinical Science Specialist at CooperSurgical and a long-standing speaker addressing the importance of genetic counseling at StartART Congresses. She earned her Masters of Science in Genetic Counseling from

Wayne State University. Ms. Isley has worked in various ART and women's health roles including preimplantation genetic testing, gamete donation, prenatal genetic testing, and newborn stem cells. Lauren previously served as Chair of the Genetic Counseling Professional Group (GCPG) of ASRM and GCPG Liaison to SART.

Her focus of interest includes issues surrounding genetic screening of gamete donors and education of recipients, as well as promoting the integration of genetic counselors into the field of assisted reproduction. The author of several peer-reviewed publications, Ms. Isley is a sought-after speaker at national meetings, exploring topics of genetic counseling and gamete donation.
