

S. Zev Williams, MD, PhD

S. Zev Williams, MD, PhD, is a reproductive endocrinologist and fertility specialist at NewYork Presbyterian Hospital. He is the Wendy D. Havens Associate Professor of Women's Health and the Chief of the Division of Reproductive Endocrinology and Infertility at Columbia University

Irving Medical Center. He completed his medical and doctoral qualifications in Molecular Biology and Biochemistry at the Icahn School of Medicine at Mount Sinai School before continuing his training at the Brigham and Women's Hospital/Massachusetts General Hospital for his residency in Obstetrics and

Gynecology. After completing his fellowship in Reproductive Endocrinology and Infertility at Weill-Cornell in Reproductive Endocrinology/Infertility, Dr. Williams then completed a post-doctoral fellowship on RNA biology in the laboratory of Dr. Thomas Tuschl at Rockefeller University. As a physician scientist, Dr. Williams' focus has been on helping those suffering from recurrent pregnancy loss and infertility and developing novel technologies and treatments to improve patient success.
